## COMPANY GROUP PROFILE

# SAKSRI

## INDUSTRY GROUP

### INTRODUCTION

Saksri Industry Co., Ltd. was established in 1992 by founders who were highly experienced and specialised in the manufacturing and supply of sulphuric acid.

The Saksri Group core business is the supplying of chemicals such as sulphuric acid, alum, poly aluminium chloride (PAC), ferrous sulphate, sulphur powder, and molten sulphur for various industries as in the water treatment, rubber, petrochemical, and paper and pulp industries.

Our policy is to provide high quality products and good service at a fair price. This principle has been our benchmark since our first day of business and we commit to maintaining these standards to all of our valued clients.

In 1996 our group founded Gemon Co., Ltd. in order to diversify and expand our product portfolio to meet customer demand.

Sunmoon Ray Co., Ltd. was established in 1989 as an importer and distributor of hazchem protective suits, safety equipment as well as other special and emergency equipment for cleaning and preventing personal exposure to toxic, nuclear, and other hazardous substances.

As our sale and production increased, in 2009, we established our own delivery fleet operating under the name of Chemsafe Co., Ltd. in order to ensure effective and safe delivery of our product to clients.

In 2009, we started production at our new sulphuric acid plant named Unicorn Chemical Industry Co., Ltd. , located in Rayong. This strategy was decided on to supplement our other plant located in Ratchaburi and our imported product enabling us to meet customer requirements and to support the growing demand of acid in the Thailand market.

## Message From our CEO: Mr. Adisorn Pipatvanich

Since our foundation in 1992, The Saksri Industry Group has grown in strength to become a leading Asean producer and distributor in our field. We have also seen diversification in our business brought about by our policy of understanding customer needs and market trends. Our success has been achieved by dedication, hard work and honesty.

Our wide range of products, are supplied to our clients on time, at a fair price and with a quality which meets our customer requirements. This is realised thanks to our strict quality controls in place and professional application by our logistics team ensuring smooth operation of the supply chain.

One of the major strengths of Saksri Industry Group is our corporate practice which emphasizes the continuity of controlled growth and capability to keep pace with change.

We apply the best features of modern technology, market information and supply chain expertise to stimulate operational efficiency in serving our customers.

### OUR VISION

The vision of Saksri Industry Group is to be the market leader and preferred industrial chemical supplier in Thailand.

### COMMITMENT

Our commitment to our customers is to remain focused on continuous improvement following our high standard of business ethics and be a true working partner to our clients.

### CERTIFICATION

In order to endorse our professional and quality levels, we have standardized our operations, practices and products to meet the requirements necessary to obtain certification issued by major local and international accredited certification bodies.

ISO 9001 : 2008 From Tuv Nord

Halal Certification

Thai Industrial Standards (TIS) มาตรฐานอุตสาหกรรม (มอก.)

All imported products meet with the required quality standards applicable in the origin country.

## OVERVIEW OF SAKSRI INDUSTRY GROUP OF COMPANY

Saksri Industry Co., Ltd.

Main Products: Sulphuric Acid, Alum, Poly Aluminium Chloride (PAC),  
Sulphur Powder, Molten Sulphur.

Plant location: Ratchaburi

Unicorn Chem Industry Co., Ltd.

Main Products: Sulphuric Acid, Alum, Poly Aluminium Chloride (PAC),  
Sulphur Powder, Molten Sulphur.

Plant location: Rayong

Gemon Co., Ltd.

Gemon, an Industrial Chemical trading company was established in 1996 under The Saksri Industry group of company. It currently markets the following product groups,

Boron, as the exclusive distributor of Borochemie International Pte. Ltd. to Supply Turkish origin boron product for Fibreglass & Glass, Agriculture, Ceramic Glazes & Frit, Timber Preservation, Metallurgy and others.

Water Treatment Chemicals such as Sulphuric Acid, Aluminium Sulphate, Poly Aluminium Chloride (PAC), Calcium Hypochlorite, ACH, etc.

Food Ingredients, Citric Acid and Sodium Citrate from TTCA and Sunshine Biotech International, Sodium Bicarbonate, Sodium Benzoate, Malic And Phosphoric Acid etc.

Sodium Carbonate (Soda Ash) and Sodium Sulphate for glass, detergent and paper industry as well as other chemical products from our extensive products' range for diverse industrial use.

Sunmoon Ray Co., Ltd.

Main Products:

Chemicals for military applications.

Specialised personal protection clothing and breathing apparatus.

Tent facilities for emergency response situations including decontamination.

Equipment for hazardous substance sampling, detection, monitoring and alert systems.

Chemsafe Co., Ltd.

Service Excellence:

We have our own fleet of both Tankers and trucks for delivering hazardous as well as non-hazardous chemical products to customers.

Every vehicle is equipped with GPS navigation system to ensure the most optimal route, compliance with Department of Land Transport (DLT) standard and regulation, and driver monitoring.

All vehicles in our fleet have been certified and compliant with Department of Industrial Works (DIW) regulations.

Our fully Licenced drivers have received thorough training in line with the standards and regulations set by The Department of Land Transport. Training includes safe driving techniques, accident prevention and driver fatigue avoidance. These disciplines make for safety on the road for our own drivers and fleet as well as other road users.

Economic driving skills are also taught, resulting in reduced fuel wastage and repair costs.

We have our own workshop with qualified, experienced mechanics who carry out scheduled preventive maintenance ensuring that every vehicle is safe and roadworthy.
